

**SONPACK C3310**

**Description**

SONPACK C3310 is manufactured from a carbonized yarn with a special PTFE-graphite impregnation. The packing is very flexible and extrusion-resistant. The impregnation maintains an excellent bond to the yarn over the complete life of the packing. The thermal and volumetric stability provides superior sealing performance with minimal gland compression. These features make C3310 suitable for use in “dry-running” applications.

**Properties**

	P [bar]	V [m/s]	pH	t [°C]
	100	-	1-12	- 60 ~ 260
	8	20		
	30	1		

**Media**

- Cold and hot water, steam, aqueous solutions, diluted acids and alkalis.

**How supplied**

Ex-stock: all popular square sections from 3mm to 25mm, boxed in 8m lengths. Selected sections available in 5kg packs.

Also supplied as split preformed rings and sets. Full fitting instructions are included.

**Application**

- Rotary pumps
- Refineries and Chemical Processing
- Water Treatment
