

SONPACK C3380

Description

SONPACK C3380 is a high temperature valve packing, is made of flexible carbon yarns and a special graphite-based impregnation, with Inconel wire reinforced. Thanks to its excellent thermal stability, it is widely used in high temperature steam applications, and because of its high pressure and extrusion resistance, it is ideally used as end rings for packing ring sets.

Properties

	P [bar]	V [m/s]	pH	t [°C]
	500	-	0-14	- 30 ~ 650
	-	-		
	-	-		

Media

- Hot water, steam, gases, oils, acids and alkalis.
- Exceptions: strongly oxidizing acids like sulfuric acid and nitric acid in high concentrations

How supplied

Ex-stock: all popular square sections from 3mm to 25mm, boxed in 8m lengths. Selected sections available in 5kg packs.

Also supplied as split preformed rings and sets. Full fitting instructions are included.

Application

- Valves
- Fittings, Couplings, and Flanges
- Refineries and Chemical Processing
- Steam
- High temperature
- Acidic or Alkaline resistance
