

SONFLON 7300 SAVLON GASKETS

Description:

Savlon gasket is rubber molded gasket having a cross sectional shape with PTFE jacketed. This gasket has the elasticity of rubber and the corrosion resistance of PTFE and gives good sealing performance. Savlon gaskets are ideal for applications such as PVC piping and glass lining piping, where only low seating stress is requested.

Technical Data:

Operating temperature	-30~150 °C
Operating pressure	20 bar

Dimension:

- ✓ Standard sizes : acc. To ASME/ANSI and JIS.
- ✓ Supplied gasket type: Full Face type

SONFLON 7400 EXPANDED PTFE SHEET

Description:

Sonflon 7400 is a pure expanded PTFE material, whose high malleability allows sealing even damaged flange, while its very low relaxation under load guarantees high fitting reliability. Suitable for most chemical applications.

Technical Data:

Operating temperature	-200°C~260°C
Operating pressure	200 bar
pH	0-14

Dimension:

- ✓ Standard sizes : 1.5 m × 1.5 m
- ✓ Thickness of gaskets: 1.0 , 1.5 , 2.0 , 3.0 mm.
